55.☐ A) side☐ B) tub☐ C) tail☐ D) feet

Directions for questions 56- 60. Read each passage carefully and by selecting the one item -- a, b, c, or d -- appropriately complete the statements which follow.

The *Plastiki* looks similar to many other boats or yachts in Sydney harbour. It is eighteen metres long, six metres wide, and it weighs about twelve thousand kilogrammes. It carries a crew of six people and has an average speed of five knots. However, once you get near to the *Plastiki*, you realise there's a big difference. It's made of 12,500 **reclaimed** plastic bottles.

One day, the environmentalist David de Rothschild was reading some information about all the plastic in the seas and oceans. He could not believe what he was reading. For example, humans throw away four out of every five plastic bottles they use, and plastic rubbish causes about 80 per cent of the pollution in the sea. Soon afterwards, Rothschild decided he wanted to help the fight against pollution in the sea. To **create publicity** for the problem, he started building a boat made of plastic bottles.

As well as building the boat with recycled plastic, it was important for him to make the boat environmentally-friendly and user-friendly. The boat uses renewable energy sources including wind power and solar energy. The crew can make meals with vegetables from the small garden at the back of the boat.

56. In line 5, 'create publicity' is closest in meaning to _____.

- ☐ A) find a solution
- ☐ B) attract attention
- ☐ C) show a reaction
- ☐ D) solve the problem

Directions for questions 56- 60. Read each passage carefully and by selecting the one item -- a, b, c, or d -- appropriately complete the statements which follow.

The *Plastiki* looks similar to many other boats or yachts in Sydney harbour. It is eighteen metres long, six metres wide, and it weighs about twelve thousand kilogrammes. It carries a crew of six people and has an average speed of five knots. However, once you get near to the *Plastiki*, you realise there's a big difference. It's made of 12,500 **reclaimed** plastic bottles.

One day, the environmentalist David de Rothschild was reading some information about all the plastic in the seas and oceans. He could not believe what he was reading. For example, humans throw away four out of every five plastic bottles they use, and plastic rubbish causes about 80 per cent of the pollution in the sea. Soon afterwards, Rothschild decided he wanted to help the fight against pollution in the sea. To **create publicity** for the problem, he started building a boat made of plastic bottles.

As well as building the boat with recycled plastic, it was important for him to make the boat environmentally-friendly and user-friendly. The boat uses renewable energy sources including wind power and solar energy. The crew can make meals with vegetables from the small garden at the back of the boat.

57. According to the passage, which one is NOT related to Plastiki?

- ☐ A) It is environmentally friendly.
- ☐ B) It uses renewable energy.
- ☐ C) It is only for vegetarians.
- ☐ D) It has a garden.

Directions for questions 56- 60. Read each passage carefully and by selecting the one item -- a, b, c, or d -- appropriately complete the statements which follow.

The *Plastiki* looks similar to many other boats or yachts in Sydney harbour. It is eighteen metres long, six metres wide, and it weighs about twelve thousand kilogrammes. It carries a crew of six people and has an average speed of five knots. However, once you get near to the *Plastiki*, you realise there's a big difference. Directions for questions 76-80. Read each passage carefully and by selecting the one item -- a, b, c, or d -- appropriately complete the statements which follow.

Beginning college students, especially those who had no problems in high school, often assume their college experience will be easy. Yet research indicates that college students usually don't do enough to prepare for the big changes ahead. Here are some of the mistakes college freshmen make or problems they might encounter.

It's tempting after a night of partying to skip class. It seems easy enough to check online to get notes or assignments. But what you are really missing isn't posted online- it's the experience of being in the classroom, listening to the professors' insights and participation in discussion. The alarm clock seems harsh, but it is best to marshal your willpower and go to class. Increase your odds by signing up for classes at times that you are most likely to go. Remember, you're paying for every class, even if you aren't going. Plus, grades often are tied to attendance, so don't risk your academic success by skipping.

Procrastination is the nemesis of many students, especially freshman. In one study of college students, two groups of students were assigned to write three papers. The first group had established due dates spaced throughout the semester; the second could turn them in whenever they wanted. The latter group handed in all their papers at the end of the semester, and the quality was poorer. Procrastination also leads to diminished energy and physical health, according to an article in psychology today. Procrastinating college students suffer greater rates of colds and flu, gastrointestinal problems and insomnia.

Mental illness is increasingly a problem at colleges and universities around the country. According to the National College Health Assessment, about one-third of U.S. college students report trouble with depression, and almost half felt anxiety. The demands of classes, managing finances, starting a new social network from scratch and possibly balancing a job can conspire to create anxiety, depression, substance abuse, eating disorders or other mental illnesses. Unfortunately, many students avoid dealing with it, or don't know where to turn for help.

76. It can be inferred from the article that the author intends to _____.

- ☐ A) raise some problems without bringing up the right solutions
- ☐ B) look down on freshman students for not being responsible and attentive enough
- ☐ C) warn the freshmen about the probable mistakes they might make
- ☐ D) advise the first college students about the stupid mistakes they make

Directions for questions 76-80. Read each passage carefully and by selecting the one item -- a, b, c, or d -- appropriately complete the statements which follow.

Yet research indicates that college students usually don't do enough to prepare for the big changes ahead. Here are some of the mistakes college freshmen make or problems they might encounter.

It's tempting after a night of partying to skip class. It seems easy enough to check online to get notes or assignments. But what you are really missing isn't posted online- it's the experience of being in the classroom, listening to the professors' insights and participation in discussion. The alarm clock seems harsh, but it is best to marshal your willpower and go to class. Increase your odds by signing up for classes at times that you are most likely to go. Remember, you're paying for every class, even if you aren't going. Plus, grades often are tied to attendance, so don't risk your academic success by skipping.

Procrastination is the nemesis of many students, especially freshman. In one study of college students, two groups of students were assigned to write three papers. The first group had established due dates spaced throughout the semester; the second could turn them in whenever they wanted. The latter group handed in all their papers at the end of the semester, and the quality was poorer. **Procrastination** also leads to diminished energy and physical health, according to an article in psychology today. Procrastinating college students suffer greater rates of colds and flu, gastrointestinal problems and insomnia.

Mental illness is increasingly a problem at colleges and universities around the country. According to the National College Health Assessment, about one-third of U.S. college students report trouble with depression, and almost half felt anxiety. The demands of classes, managing finances, starting a new social network from scratch and possibly balancing a job can conspire to create anxiety, depression, substance abuse, eating disorders or other mental illnesses. Unfortunately, many students avoid dealing with it, or don't know where to turn for help.

77. Which statement is true regarding the amount of reported depression and anxiety among U.S. college students?

- ☐ A) The number of students who suffer from anxiety is less than those who suffer from depression.
- ☐ B) Students equally suffer from anxiety and depression.
- ☐ C) Depression is much more common than anxiety.
- ☐ D) Fewer students are affected by depression but about half of them experience anxiety.

Directions for questions 76-80. Read each passage carefully and by selecting the one item -- a, b, c, or d -- appropriately complete the statements which follow.

Beginning college students, especially those who had no problems in high school, often assume their college experience will be easy. Yet research indicates that college students usually don't do enough to prepare for the big changes ahead. Here are some of the mistakes college freshmen make or problems they might encounter.
